ABSTRACTED-PUB-NO: KR2004042477A

BASIC-ABSTRACT:

NOVELTY - A mobile phone having a stereo sound function is provided to listen to a uniform bell sound without the degradation of bell volume irrespective of opening and closing a folder by installing a speaker at both sides of a hinge connection portion.

DETAILED DESCRIPTION - A body portion (10) has a battery, input buttons (11), a PCB and a microphone (13). An LCD (20), rotatably installed on one end of the body portion (10), has a liquid crystal panel (22). A hinge connection portion (30) connects the LCD (20) with the body portion (10) for rotating the LCD (20) in an unfolded state or a folded state after the LCD (20) and the

body portion

(10) are overlapped. Speaker safe-reception portions (40) are installed at both sides of the hinge connection portion (30). Speakers (50) are installed in the speaker safe-reception portions (40).
